

Dear Editor: Thank you for publishing my “letter to the editor.” I’ve kept it short (200 words) by posting more detailed white papers in the library at my website.

Obamacare – It’s a Train Wreck!

Door’s the only northeast Wisconsin county to reelect Obama, thereby making Obamacare the “law of our land.” It’s therefore fitting, we give Door Democrats credit for Obamacare, its double digit premium increases, skyrocketing deductibles, and government’ subsidies demanded by union leaders. Thankfully, many are abandoning Obama and joining efforts to stop the implosion of our healthcare and insurance industries. Now if we can get Tammy Baldwin to support Ron Johnson’s bill that’ll allow us to keep our policies and doctors, life will be good. Let’s also thank Scott Walker for not setting up a Wisconsin’ exchange.

I don’t advocate abandoning your political party; but rather abandoning a failed administration that requires us to purchase healthcare that violates our conscience and bankrupts our country. However, if you want to join local Republicans, send \$15 to PO Box 94, Sturgeon Bay, WI 54235. At least, start listening to FOX as well as our main street media. Let’s all strive to be better informed, less impressed by campaign rhetoric, and more in tune to what’s needed to regain our independence. If you’re wondering what to do about Obamacare, I’ve posted some ideas under “Guarding the Door” at www.RMLearningCenter.com.

Conclusion: Only under a Socialist, Communist, or Fascist form of government are citizens required to purchase only health insurance that’s approved by their Federal government. Only under a Monarchy can the Head of State do a photo op at a homeless shelter than jet off on another \$425,000 family vacation listing daughters as “staff-members to justify their expenses. It’s time for even the staunchest supporter of the Obama regime to come to their senses. It’s time they keep current by listening to both the main-street media and FOX, as well as receive regular updates from “Judicial Watch” at: <http://www.judicialwatch.org/press-room> The above came from archived release dated October 4, 2011. Note the increased number of law suits as doctors attempt to “bite the bullet.”
